

1. (a)

(b) $P(A, B, C, D) = P(A) P(B) P(C|A, B) P(D|C)$

parameters : $1 + 1 + 4 + 2 = 8$

2. (a) $B \perp C | A$

$D \perp A | B, C$

$$\begin{aligned}
 \text{(b) } P(B, C, D | \neg A) &= \frac{P(\neg A, B, C, D)}{P(\neg A)} \\
 &= \frac{P(D|B, C) P(B|\neg A) P(C|\neg A) \cancel{P(\neg A)}}{\cancel{P(\neg A)}}
 \end{aligned}$$

B	C	D	$P(B, C, D \neg A)$
0	0	0	0.24375
0	0	1	0.13125
0	1	0	0.1125
0	1	1	0.0125
1	0	0	0.28125
1	0	1	0.09375
1	1	0	0.0875
1	1	1	0.0375

$P(\neg A)$

B	C	D	$P(B, C, D \neg A)$
0	0	0	0.24375
0	0	1	0.13125
0	1	0	0.1125
0	1	1	0.0125
1	0	0	0.28125
1	0	1	0.09375
1	1	0	0.0875
1	1	1	0.0375

From the table, by calculation, we get that $A \perp B, A \perp C, B \perp C, A \perp B | C, A \perp C | B, B \perp C | A$
